Expanko, Inc Introduces Heirloom

For Immediate Release, June 2012: Expanko, Inc, industry leaders in commercial cork flooring, announces Heirloom by Expanko Resilient Flooring. Only available from Expanko, Heirloom will feature a unique ½" (12mm) thick, Class 1 Fire Rated, solid cork floor tile in standard 12"x 12", 24"x24" and custom cuts. Finishes available will be only Light, Medium and Dark. Heirloom ½" thick cork flooring has a proven record of performance in commercial facilities. With installations up to 80 years old, Expanko is pleased to reintroduce this commercial, glue down cork floor. Historical installations can still be viewed in prestigious locations such as the United States Chamber of Commerce and the Harvard Law Library.

"The beauty of cork flooring comes from its unique visual texture and natural resiliency. Expanko is the industry pioneer of half-inch cork floors and remain the only manufacturer able to produce it in North America. We are proud to reintroduce the world to its superior quality. While 3/16" & 5/16" thick cork remain quality choices, half inch is an affordable alternative that significantly increases the lifespan, sound reducing qualities and low maintenance needs.", explains Randy Gillespie, Senior Vice President of Sales and Marketing at Expanko. "The quality of our half-inch cork flooring is evident in the many installations across the United States that have been in place for 50+ years."

About Heirloom by Expanko

Heirloom cork flooring features a full ½"/12mm thick solid cork floor tile, available exclusively from Expanko, Inc. Heirloom is available in three colors: Light, Medium and Dark. The colors are achieved through the baking process, without any dyes or tinting. Heirloom is stocked in standard 12"x12" and 24"x24" tiles. All Heirloom patterns carry a Class 1 fire rating. Heirloom cork can also be cut in custom shapes to achieve an endless number of visual patterns, including Expanko's signature herringbone, as seen in the Lafayette College Library. Heirloom is priced to be competitive with current cork tiles on the market for a true alternative to wood or other cork flooring.

About Expanko Resilient Flooring

Expanko Resilient Flooring is a subsidiary of Expanko Inc., a leader in environmental options for commercial construction. In addition to Expanko Resilient Flooring, Expanko Inc. also manufactures Fritztile Flexible Terrazzo Tile (www.fritztile.com).
