ACOUSTICAL INFORMATION

TECHNICAL SUPPORT 800.345.6202

Vallarex Cork Floating Floor has been tested in accordance with ASTM standards ASTM E90/ASTM E413 (STC rating) as well as ASTM E492 / ASTM E989 (IIC rating). These tests indicate the Sound Transmission Class (STC) and Impact Insulation Class (IIC) of the flooring product.

Vallarex Cork Floating Floor Acoustical Rating:

IIC Rating - 75 dB
STC Rating - 66 dB

These tests signify that Vallarex contribute significantly to the reduction of sound transmission. Vallarex is an excellent choice for use where sound reduction is required. Areas particularly suited for these products would include office and apartment complexes. In those areas that require additional sound transmission reduction, Vallarex may be installed over a cork underlayment.
